

CHRISTINE CORRY

christinecorry1405@gmail.com | (916) 812 3212 | linkedin.com/in/christinecorry/

EDUCATION

University of California, Berkeley

May 2026

B.A. Computer Science | *College of Computing, Data Science, and Society*

GPA: 3.95

B.A. Astrophysics | *College of Letters & Sciences* | Honors Distinction

Relevant Coursework: Data Ethics, AI Public Policy, Computer Architecture, Data Structures, Algorithms, Cybersecurity, Databases, Computability & Complexity Theory, Deep Learning, Discrete Math, Probability, Abstract Linear Algebra, Quantum Mechanics, Electromagnetism, Planetary Astrophysics, Relativistic Cosmology, Cognitive Science

WORK EXPERIENCE

Second Look Research — University of Chicago Existential Risk Laboratory (XLab)

Jun 2026 - Present

AI Safety Research Fellow

Chicago, IL

- Producing open-source replications of empirical AI safety research as part of a 10-week fellowship focused on strengthening the epistemic foundations of the field.

Legacy Survey of Space and Time — SLAC Laboratory

Sep 2025 - Jun 2026

Rubin Observatory ML and Optical Astrophysics Student Researcher

Berkeley, CA

- Applied Pearson correlation, OLS/Ridge regression, and PCA across 13 thermal sensors to characterize residual Z4 focus drift across 23 open-loop stability runs at the Vera C. Rubin Observatory.
- Found thermal-focus coupling to be distributed across multiple mechanisms and timescales, ruling out simple linear models and motivating future nonlinear and multivariate approaches.

NASA Ames Research Center/SJSURF

May 2023 - May 2026

Human Systems Integration Research Assistant

Moffett Field, CA

- Analyzed pilot anticipatory monitoring performance across a pre-test/intervention/post-test web-based study of 38 airline pilots, contributing to findings of significant post-tutorial gains on scenario-based assessment tasks.
- Visualized statistical findings on >2,000 data points in RStudio and formalized method descriptions and cognitive findings for technical memorandums submitted for government use.

UC Berkeley School of Information — Farid Lab

Jan 2026 - Apr 2026

AI Policy and Computer Vision Student Researcher

Berkeley, CA

- Analytically compared machine learning image inverse problem systems, from linear and nearest neighbor to denoising, deblurring, and super-resolution, with optical character recognition and a human perceptual study.

Apple

May - Aug 2025

Applied ML Software Engineering Intern

Cupertino, CA

- Designed and developed an internal LLM-based tool to streamline Quality Engineering workflows, reducing manual testing overhead and improving bug detection accuracy across product development cycles.
- Built end-to-end ML pipeline from data preprocessing to model deployment, implementing scalable algorithms to expand use across Quality Engineering and Software Engineering teams.

Science Corps

Jan 2023 - Present

Program Manager

Remote

- Managed recruitment pipeline targeting top university graduate programs to place PhD fellows in underprivileged communities abroad, expanding access to science education.
- Coordinated social media outreach and strategic planning to support fellow operations and program growth.

Innovative Genomics Institute — Rubin Lab

Jan 2024 - May 2025

Machine Learning Research Intern

Berkeley, CA

- Optimized hyperparameters for a 229M parameter DNA generation LLM trained from scratch, evaluating novel sequence outputs via BLAST, Foldseek, and InterPro.

AWARDS & ACHIEVEMENTS

Honors to Date

May 16, 2025

Department Honors

Astrophysics | College of Letters & Sciences

Dean's List

College of Computing, Data Science, & Society | College of Letters & Sciences

Best Overall Paper

HFES ASPIRE Aerospace Systems 2025 | Billman, D., Baron, B., Jr., Corry, P. C., Cusano, L., Peterson, M., & Mumaw, R. J. (2025). | *Measuring anticipatory monitoring skills using a crew briefing task.*

PAPERS & PUBLICATIONS

- Corry, C.** (2026). *Optimized for agreement: Sycophancy, RLHF, and the political economy of AI validation*. Unpublished manuscript, Division of Computing, Data Science, and Society, University of California, Berkeley.
- Corry, C.** (2026). *Deepfakes and democratic integrity: A policy framework for AI-generated political content*. Unpublished manuscript, Goldman School of Public Policy, University of California, Berkeley.
- Corry, C.** (2026). *Thermal predictors of open-loop focus drift at the Vera C. Rubin Observatory (Honors thesis)*. Department of Astronomy, University of California, Berkeley.
- Billman, D., Baron Jr, B., **Corry, P. C.**, Cusano, L., Peterson, M., & Mumaw, R. J. (2025). *Measuring Anticipatory Monitoring Skills Using a Crew Briefing Task*. In Proceedings of the Human Factors and Ergonomics Society Annual Meeting (p. 10711813251360012). Sage CA: Los Angeles, CA: SAGE Publications.
<https://doi.org/10.1177/10711813251360012>
Awarded **Best Overall Paper - Human Factors and Ergonomics Society ASPIRE Aerospace Systems 2025**
- Peterson, M., Baron Jr, B., Cusano, L., Mumaw, R. J., **Corry, P. C.**, Hoffman, D., & Billman, D. O. (2025). *Scenario-Based Task Design for Airline Pilot Anticipatory Behaviors: Asynchronous Assessment of Complex Cognitive Skills*. Journal of Applied Instructional Design. <https://doi.org/10.59668/2222.21502>
- Billman, D., Baron Jr, B., **Corry, P. C.**, Cusano, L., Peterson, M., & Mumaw, R. J. (2025, May). *Initial Measures Show Web-Delivered Learning Module Improves Pilots' Monitoring and Anticipation*. Proceedings of the 23rd International Symposium for Aviation Psychologists.
- Corry, C.** (2026, January 11). *AI 101: Artificial intelligence and machine learning basics*. Reductions.
<https://proofbyvibes.substack.com/p/ai-101>
- Corry, C.** (2026, March 4). *Misalignment and deception: A short overview*. Reductions.
<https://proofbyvibes.substack.com/p/misalignment-and-deception>

PROJECTS

- Photometric Analysis and Color-Magnitude Diagram of M35** Dec 2025
- Performed absolute photometry of open cluster M35 including flux calibration, airmass correction, and CMD construction to analyze stellar temperatures and evolutionary features.
- Observation and Analysis of WASP-52b Transit** Nov 2025
- Reduced CCD time-series images and performed aperture photometry to model exoplanet transit light curves and derive system parameters.
- Spectrographic Optical Design and Calibration to Assess Solar Composition** Oct 2025
- Developed a wavelength calibration pipeline using arc and continuum lamps and measured direct vs. diffuse solar irradiance to quantify atmospheric scattering.
- Optical Imaging System Design and CMOS Property Determination** Sep 2025
- Characterized CMOS detector gain, read noise, dark current, and quantum efficiency and built an aligned optical bench with collimating and focusing optics.
- Cook County Housing** Oct 2024
- Built regression models with feature engineering, cross-validation, and geospatial visualizations on Cook County housing data to estimate sale prices and analyze valuation disparities.
- ‘Spam and Ham’ Email Sentiment Classification** Dec 2024
- Built a spam classification pipeline in Python using TF-IDF feature extraction and scikit-learn classifiers, optimized via cross-validation for precision and recall.
- Secure File Sharing System** Nov 2024
- Implemented a stateless file sharing system in Go with authenticated registration, encrypted storage, and invitation-based access control enforced against adversarial remote datastores.

EXTRACURRICULARS

CDSS Dean’s Undergraduate Leadership Forum	<i>Advisor</i>	Oct 2025 - Present
Motorsport Mechanics of Berkeley	<i>Treasurer</i>	Jan 2025 - Present
Princeton Review	<i>SAT Tutor</i>	Jun 2024 - Apr 2025
California Youth Crisis Line	<i>Crisis Hotline Volunteer</i>	May 2021 - Mar 2022
Women in Politics	<i>Magazine Manager</i>	Jun 2021 - Sep 2022

SKILLS

Programming Languages: Python, Java, C, C++, R, SQL, NoSQL, Swift

Libraries & Frameworks: PyTorch, Hugging Face, scikit-learn, XGBoost, FastAPI, Astropy, Photutils, W&B, Tinker

Skills: Statistical Modeling, Data Visualization, Cross-Functional & Technical Communication, Crisis Intervention, Advocacy
